DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 4-11, and 13-16 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Newton #291,927. Newton discloses a post anchor which may be made from sheet metal. The post anchor comprising a holder *S*; a ground engaging member including a planar central web *C*, a planar first flange and a planar second flange; the holder having at least one upright member *S* which provides post support, the holder also defining a recess to receive a post. Newton also discloses rigidly attaching the holder to the ground engaging member. Although silent to the welding of members and bending of sheet metal, it is well known in the art of metal working to weld metal member so as to unite or connect the members and it is well known to bend sheet metal to form a desired shape or angle.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/772,904 Page 3

Art Unit: 3673

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- 5. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newton in view of Stuart #6,461,084. Newton discloses the claimed invention except for the collets and clamping member. Stuart teaches that it is known to provide collets 4 and a clamp 5 on a ground anchor 1 as set forth at column 3, lines 15-25. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide collets and a clamp for a ground anchor, as taught by Stuart in order to facilitate attachment of a circular shaped post to a ground anchor.
- 6. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Newton in view of Berger #3,896,596. Newton discloses the claimed invention except for the angle formed by the flanges and central web being obtuse. Berger teaches that it is known to provide flanges 20 that extend from a central web 10 at an obtuse angle as set forth at columns 4-5, lines 58-16. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form an obtuse angle, as taught by Berger in order to resist laterally directed forces.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. UK '613 discloses bending of sheet metal to form a ground anchor. Stuart '084 and Miceli '149 disclose welding of post supports.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick L. Lagman whose telephone number is 571-

272-7043. The examiner can normally be reached on Monday-Friday 9:00am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patricia Engle can be reached on 571-272-6660. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
